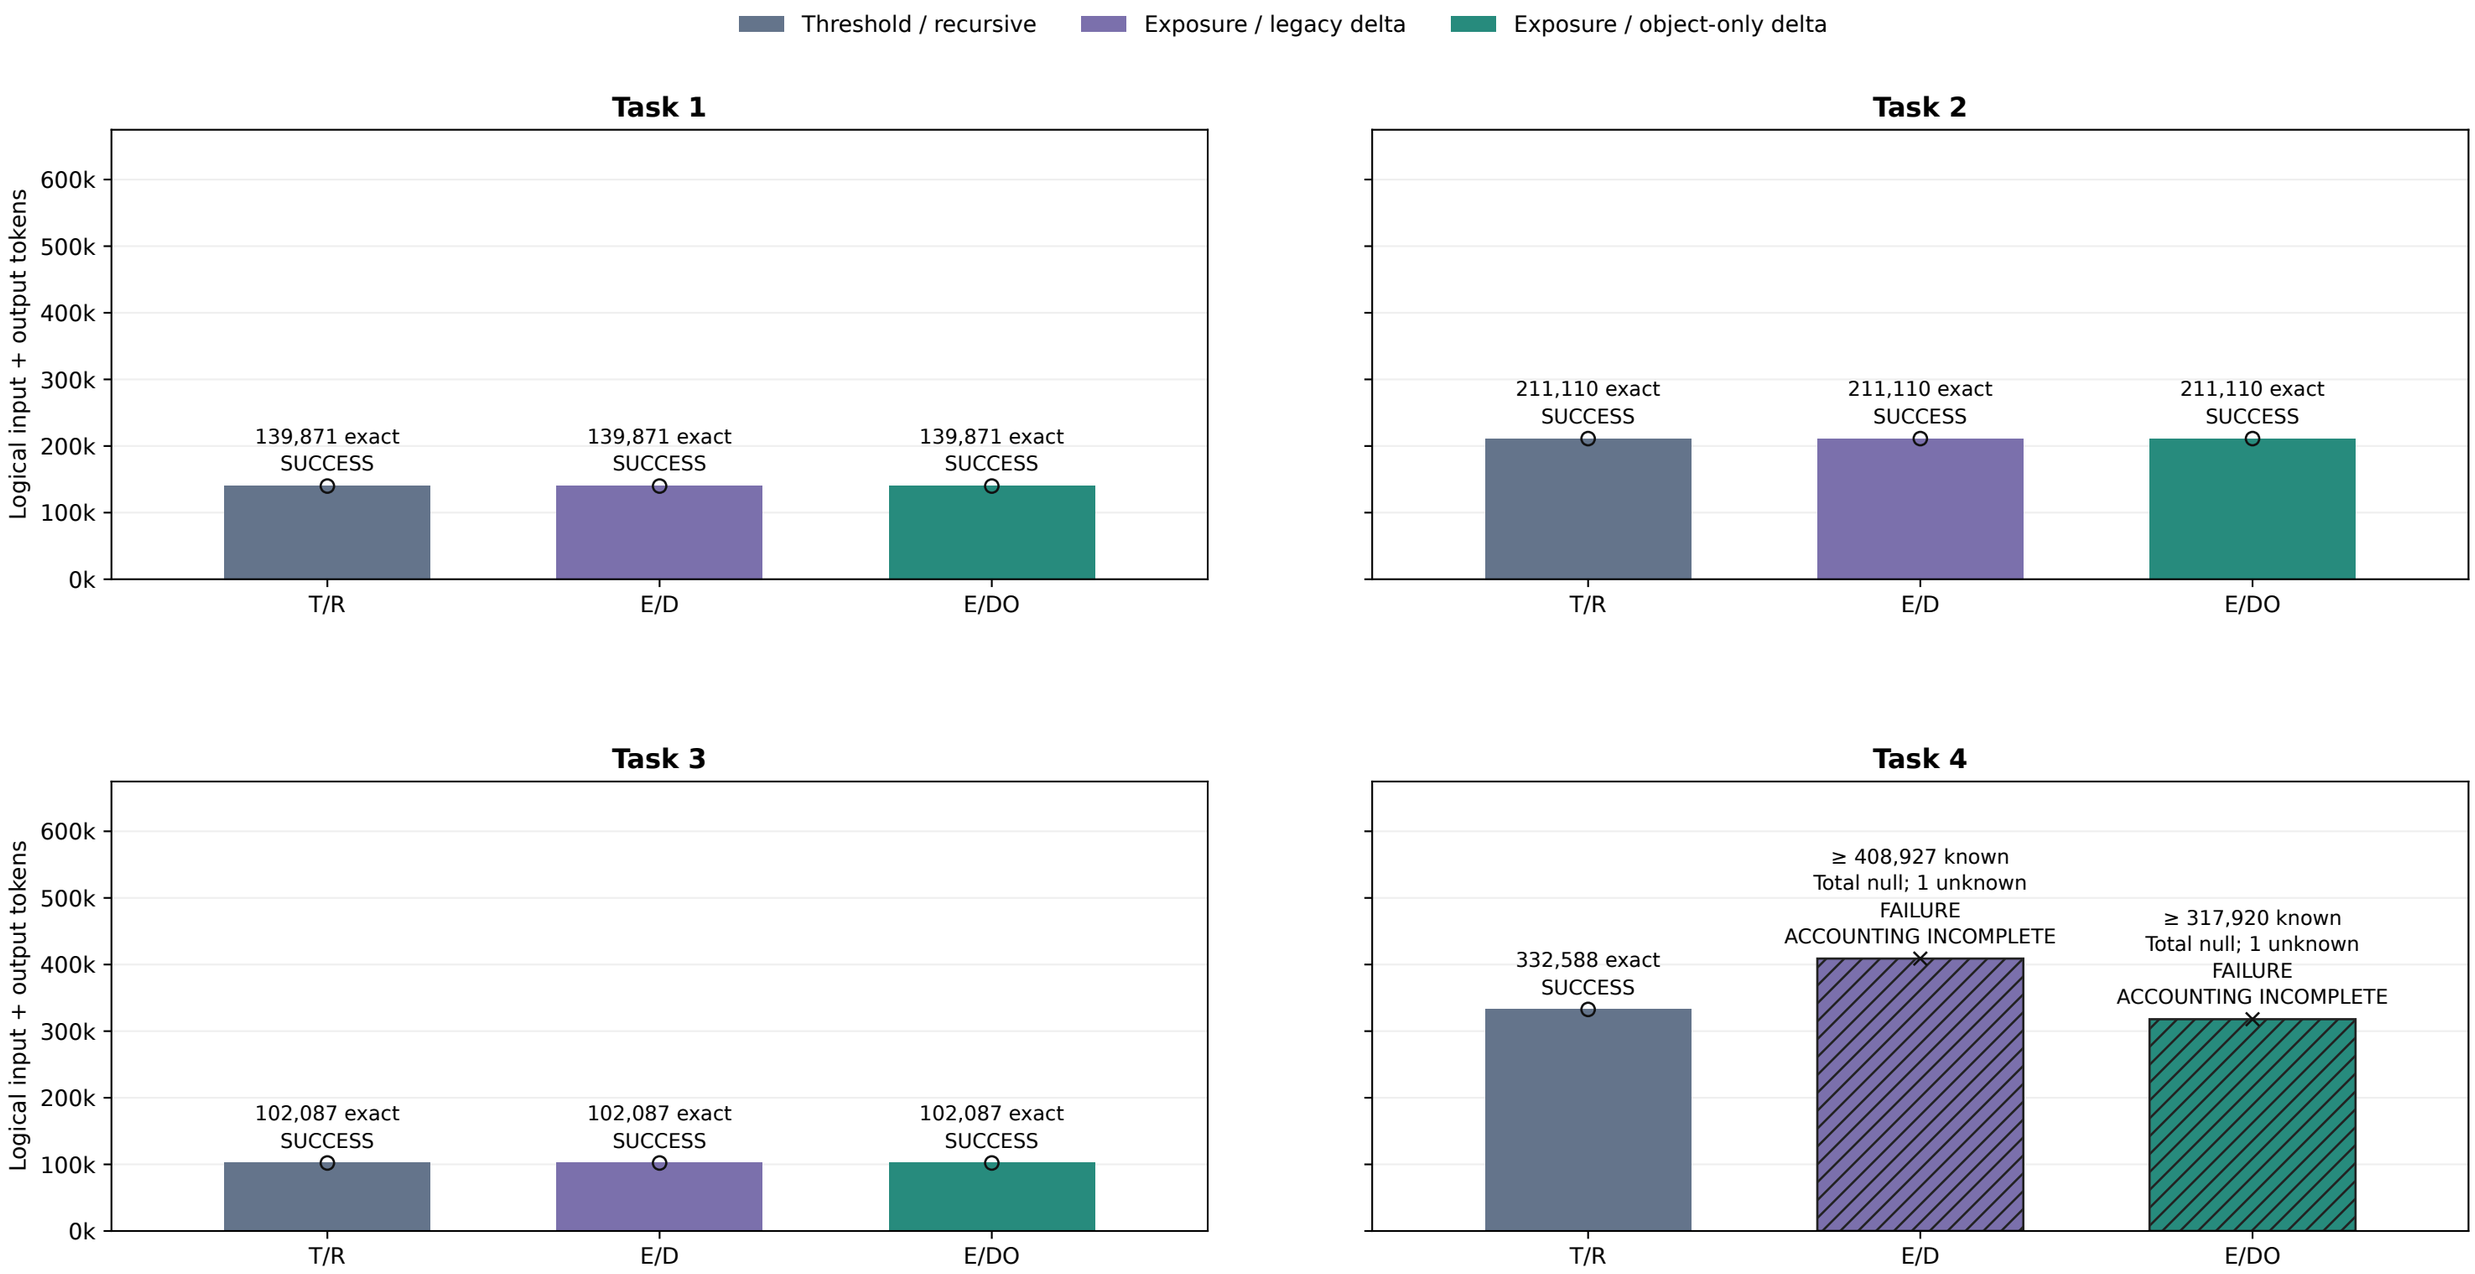
P140 — Whole-job cost and official outcome



T/R: successes 4/4 | known 785,656 | fixed exact total null | unknown calls 0 | count-missing cells 0
E/D: successes 3/4 | known 861,995 | fixed exact total null | unknown calls 1 | count-missing cells 0
E/DO: successes 3/4 | known 770,988 | fixed exact total null | unknown calls 1 | count-missing cells 0

All 12 planned cells remain. Hatching marks a known lower bound; missing usage is not zero. × failure; ○ success; ◇ unevaluated.
Costs include actor + focus input/output, prompt clarification, paid rejected summaries and failures. Cached input is never deducted.
Fixed mode totals stay null unless all 12 cells have known evaluated costs. Four known tasks, one seed (57); no earlier-cohort pooling.
