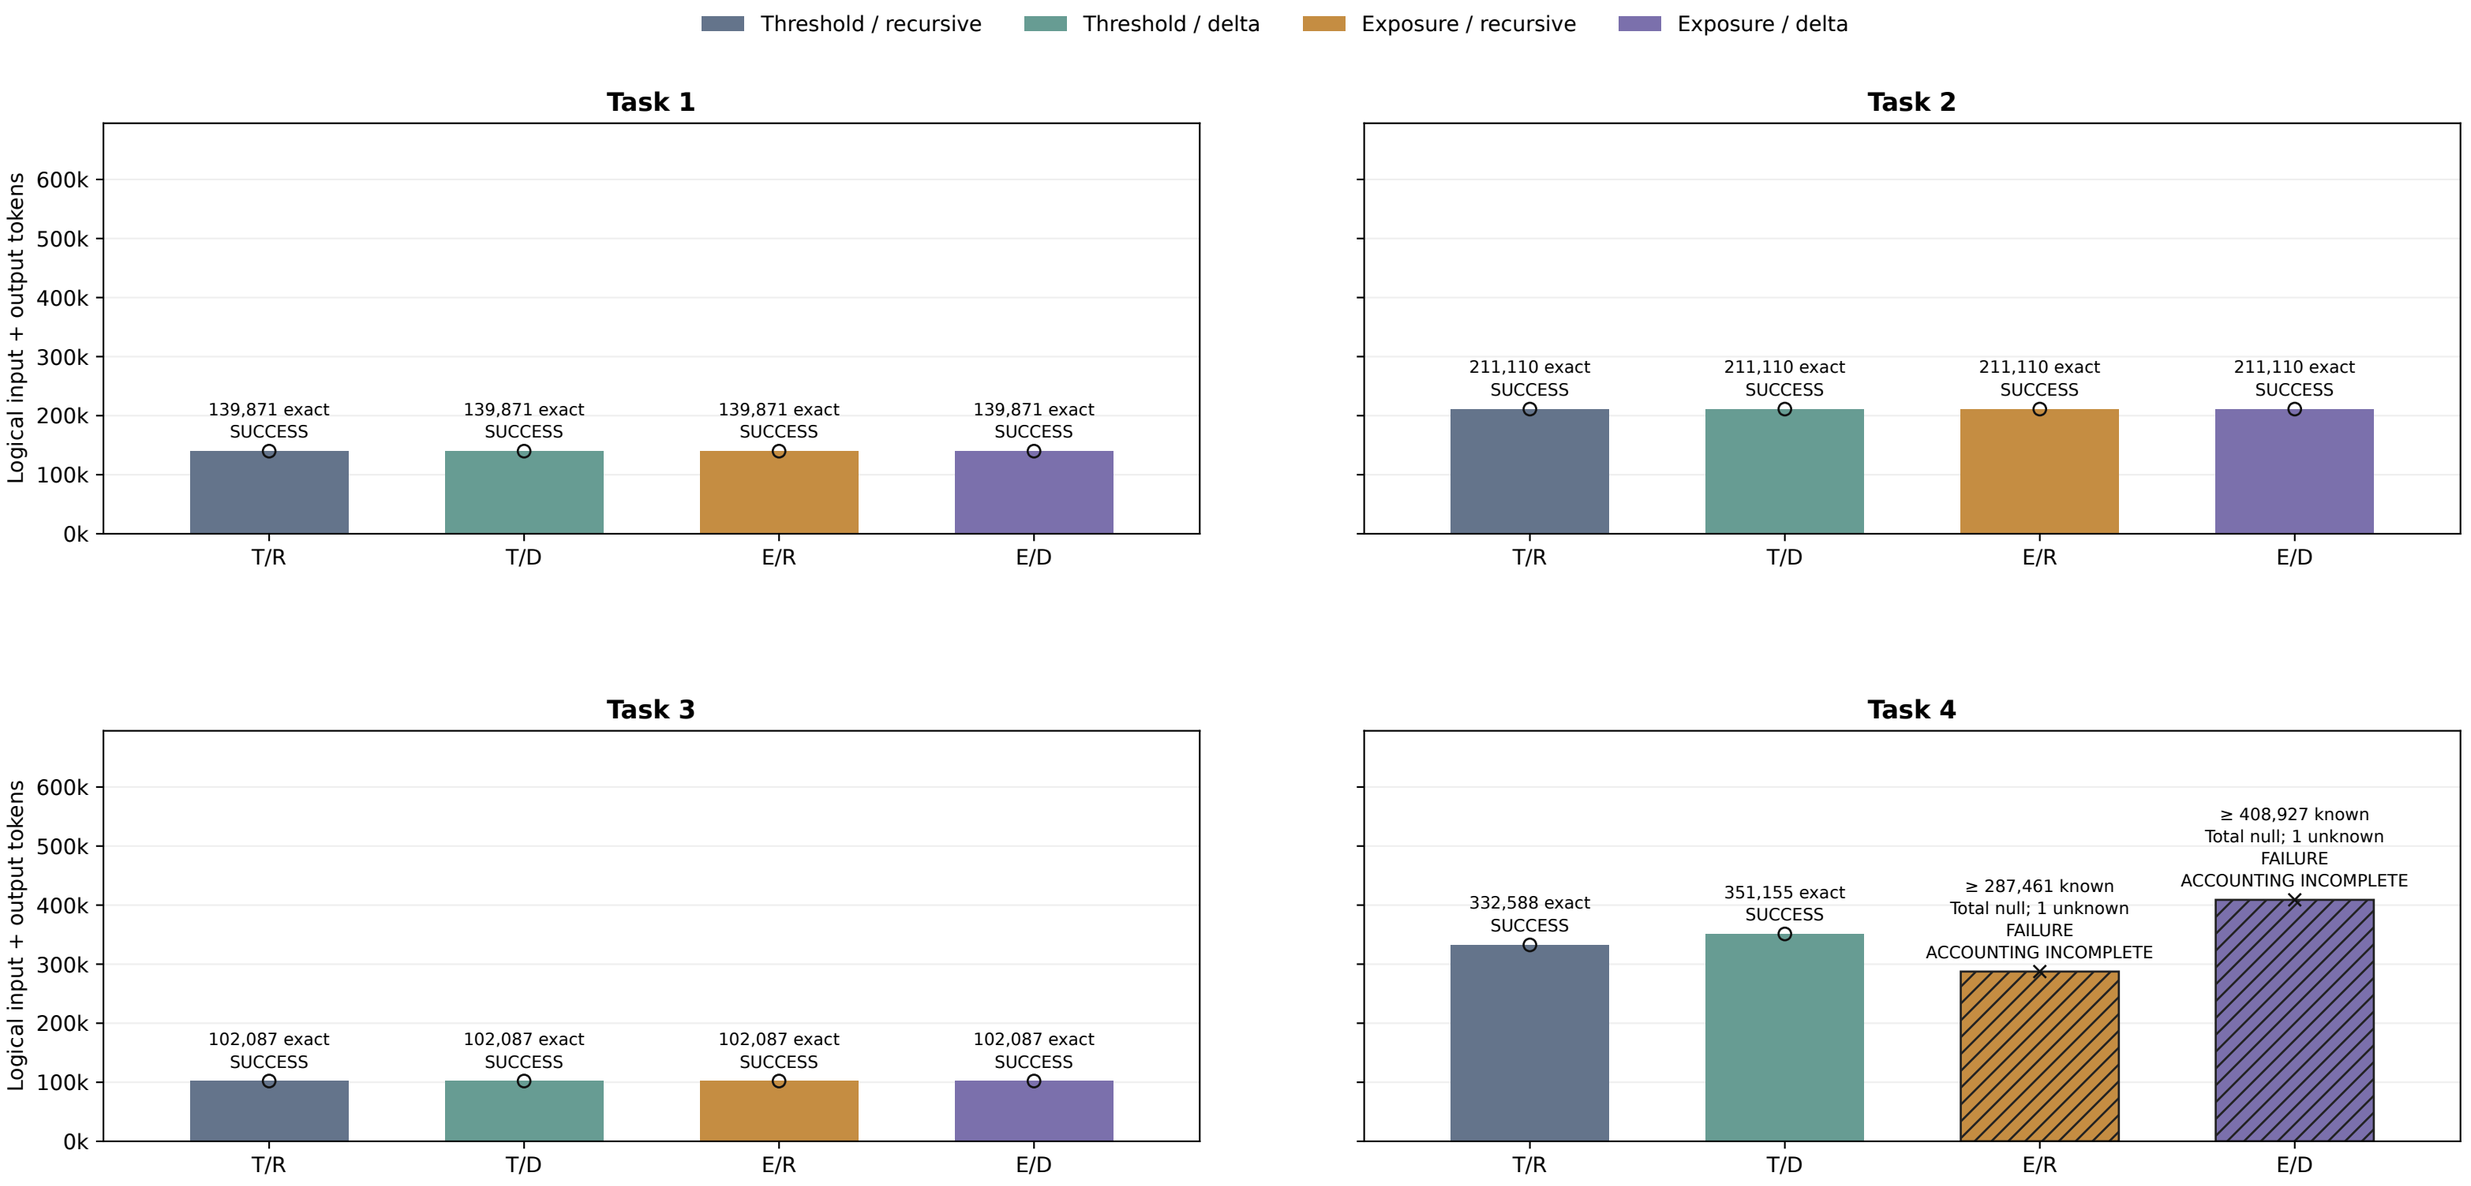
P139 — Whole-job cost and official outcome



T/R: successes 4/4 | known 785,656 | fixed exact total null | unknown calls 0 | count-missing cells 0
T/D: successes 4/4 | known 804,223 | fixed exact total null | unknown calls 0 | count-missing cells 0
E/R: successes 3/4 | known 740,529 | fixed exact total null | unknown calls 1 | count-missing cells 0
E/D: successes 3/4 | known 861,995 | fixed exact total null | unknown calls 1 | count-missing cells 0

All 16 planned cells remain. Hatching marks a known lower bound; missing usage is not zero. × failure; ○ success; ◇ unevaluated.
Costs include all actor + focus input/output and failed summaries. Cached input is included, never deducted.
Fixed mode totals are null unless all 16 cells have known evaluated costs. Four known tasks, seed 57, max 2 opportunities; earlier cohorts excluded.
